

Dear Hiring Manager,

I am writing to apply for the Software Engineer role within ST Engineering's Mission Software & Services division as advertised on job street. I am eager to apply what I have learned to make a tangible impact on national security and public safety by working on mission-critical systems.

ST Engineering's commitment to leveraging on cutting edge technology and innovation to tackle real-world problems deeply aligns with my passion for software engineering. The opportunity to work on command, control and communication systems while gaining experience on defence and public security solutions is very alluring for me.

My skills in C++, Java and full-stack development in conjunction with my experience building technical projects, Gameboy color emulation and full-stack web applications has prepared me to contribute effectively to your team. I am actively acquiring skills in ReactJS, NodeJS and Agile methodologies to align with industry best practices.

I am enthralled that this opportunity would genuinely make a difference in people's lives. I am steadfast in upholding ST Engineering's core values and approaching every project with dedication to quality, willingness to take on complex challenges and learn from experienced professionals.

I have attached my resume for your review, and my digital portfolio is available at <https://kendricklmaor.github.io/portfolio/>. I am excited to further discuss how I can contribute to ST Engineering's Mission Software & Services division.

Thank you for considering my application.

Yours sincerely,

Carlwin Joshua
