

CARLWIN JOSHUA

Singapore | <https://kendricklmaor.github.io/portfolio>

+65 90002222 | ChiefKeefSosa@gmail.com

I am an aspiring software engineer skilled in C++, Java and other object-oriented programming languages. Seeking entry-level role to apply hands-on experience and contribute to meaningful projects.

EXPERIENCE

RETAIL ASSOCIATE

Challenger Technologies Limited | Singapore

2022 – 2023

Assisted customers with product inquiries and recommendations for electronics and computing devices. Developed strong communication skills explaining technical specifications to non-technical customers.

EDUCATION

DIPLOMA IN INFOCOMM AND MEDIA ENGINEERING

Nanyang Polytechnic | April 2024 - Present

- Relevant coursework: Object-oriented programming, web development, database fundamentals
- GPA 3.8
- Awarded Best Object-Oriented Programming Project

Bowen Secondary School | 2019 - 2023

SKILLS

- Programming Languages : C++, Java, C#, Python, HTML, CSS, Javascript, PHP
 - Framework & Tools: ASP.NET, Node.js, Git, Cmake
-

PROJECTS

Gameboy Color Emulator | C++, SDL3

Building a Gameboy Color Emulator with accurate CPU execution, memory systems and graphics.

- Implemented all documented CPU instructions, CPU registers and Flag Registers.

- Built a memory system to support memory banking and memory-mapped hardware
- Implemented a basic graphics rendering pipeline to support background tile rendering, colors and scrolling.

Minecraft Server Bot | Python3, Google Cloud SDK

Built a discord bot that allows users to launch a Minecraft multiplayer server by sending messages to a bot

- Used google cloud SDK to build a python script that manages server VMs in google cloud platform.
- Used google cloud platform's cloud run service to run the bot without a server.
- Used Python's HTTP library to interact with discord http API.

Pong game | C++, Raylib

Built the classic pong game using raylib library

- Built a basic pong game engine using C++
 - Implemented rendering system using raylib's graphics library
 - Implemented simple physics to enable collision
-
